

When design
meets functionality
there comes DiLo

 we make lockers smarter

A **flexible** smart lock

- new lockers
- retrofit on existing lockers

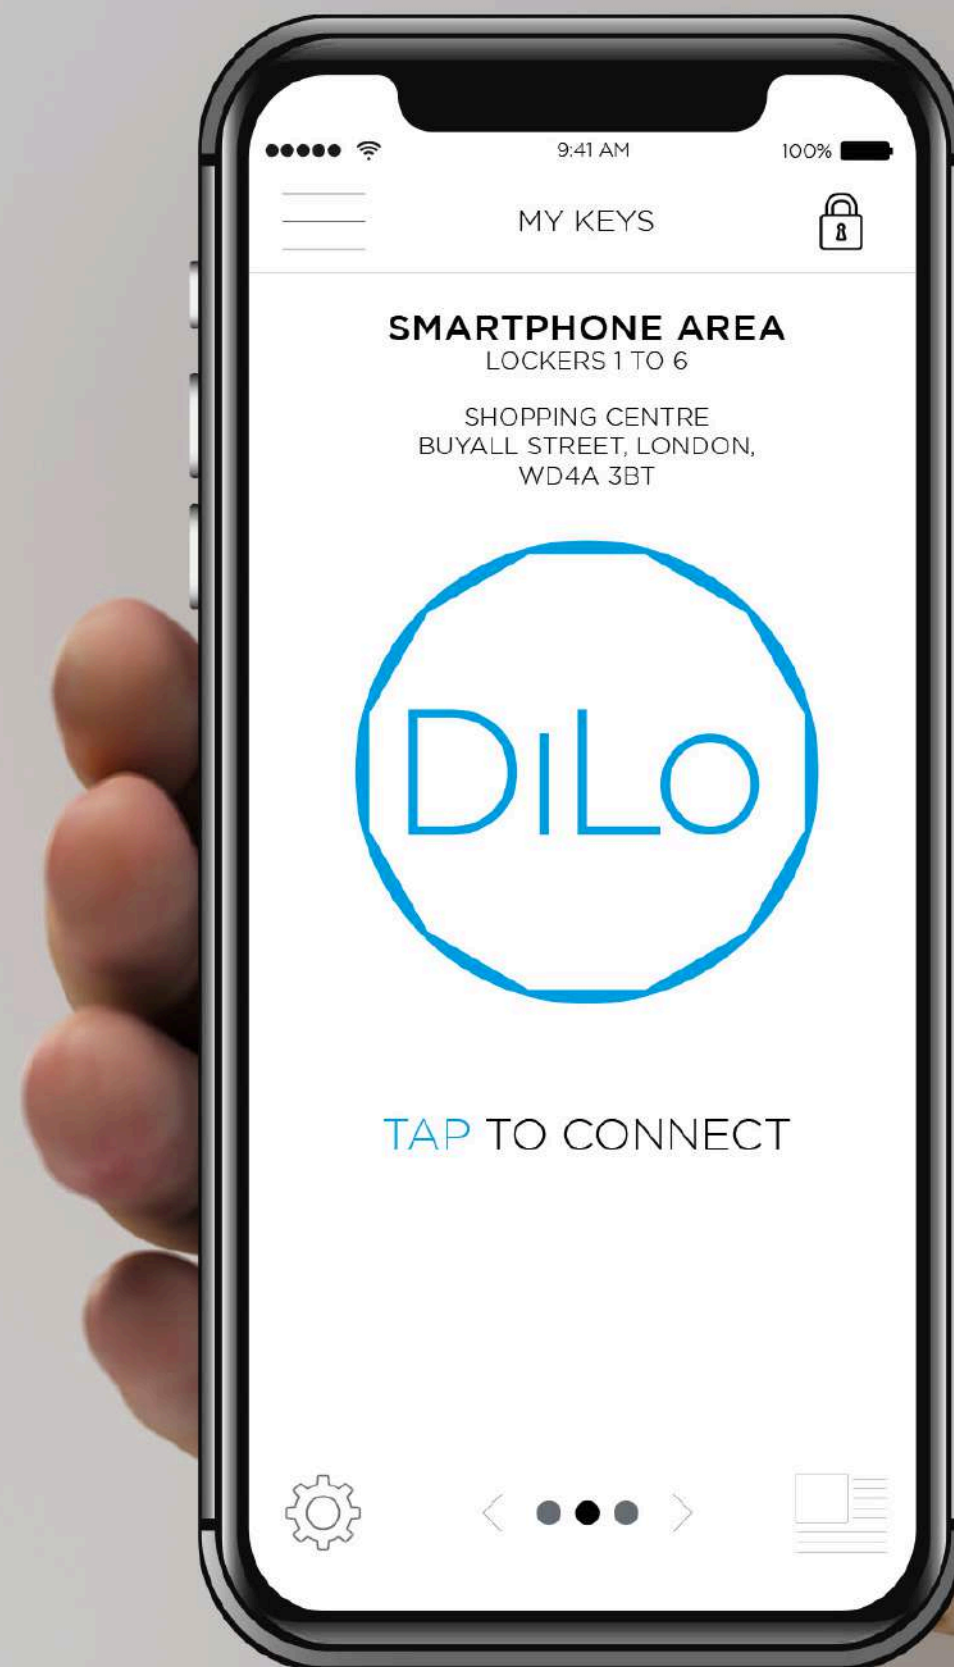

Installable **on any material**

- wood
- hpl
- glass
- metal

Simple to use

- download the APP
- scan the QR code or tap on the icon
- the knob will be released
- open the locker
- use it for the necessary time

Easily configurable

- set the lockers for free use
- limit the lockers use to a selected group of employees
- assign a locker to a specific person

Ideal for many applications

- storage furniture in shops
- displays in shops
- free lockers service in public spaces
- ...

Intuitive for the admin

- assigns a specific locker to a specific user
- sets time limits for its usage
- controls every access using a smartphone

Fully **integrable**

- Open APIs and SDKs
- complete integration in any APP and management system

Robust and “up-to-date”

- manual knob rotation grants correct functioning in any condition
- high security even against accidental bumps: in closing position DiLo is flush to the door surface
- made of **antibacterial** material: eternal, not just a surface coverage
- inert from the microbiological point of view
