

LET YOUR DEVICES FLY!

AliA allows you to manage all the digital keys of our smart locks from a single platform. Lockers, doors, vehicles: operate and configure everything from a single App, manage access, share keys, monitor the system. Everything is enhanced by contemporary and recognizable graphics, designed to make the content of each screen easy and clearly visible, in all conditions. AliA is intuitive and guides the user in any operation.

AliA connects the physical and digital worlds, moving to the **Cloud** the **access management**, the activation and monitoring of any mechanical device.

A REVOLUTION ON DOOR

AirDoor is the first handle by Serrature Meroni. Designed for the office but not only. Thanks to a set of accessories, it can be installed on wood, metal and glass. It comes in two versions: a mechanical handle and an electronic access control one integrating into the ecosystem of products manageable with AliA.

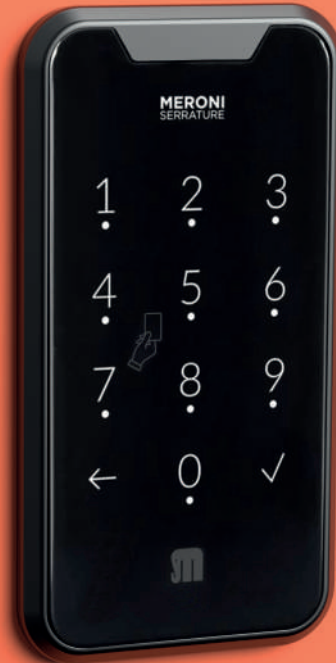

AirCylinder transforms a door with a standard European profile cylinder into a smart one in just a few steps. It integrates into the range of products manageable with AliA. AirCylinder can be used with classic RFID cards, too.

WPAD rfid

EFFICIENT AND RELIABLE ELECTRONIC LOCKS

WPAD rfid is the electronic lock, with front keypad and RFID card reader, suitable for furniture and lockers with wooden doors. It is wireless and battery powered. Available with a multi-layered password management option and a public/private mode switch.

1051U

MECHANICAL COMBINATION LOCK

1051U is a combination lock with a solid design and an ergonomic knob. The easy code recovery, the variety of accessories and the flexible application on wood, metal and glass, make 1051U the ideal solution for any furniture. It is available in black or silver finish.
